# Location of branches and representative offices of GC AVT0graph

## TD AVT0graph

Was established in 1999 and is currently the major enterprise of the Group of Companies.

TD AVT0graph is specialized in federal distribution of abrasives, polishing systems, painting equipment and materials, ancillaries and PPE from the leading European manufacturers.

Among regular clients there are more than 500 car dealers, body shops, retail and wholesale shops.

Dealer network includes more than 250 companies in all 85 regions of Russia.

# Range

- Abrasive materials;
- Paint and lacquer materials and paint mixing systems;
- Polishing systems;
- Sanding tools;
- Painting equipment;
- Masking tapes;
- Masking materials;
- Adhesives and sealants;
- Wiping materials;
- Lighting equipment.

# Main suppliers

**Jeta PRO**

Paint and lacquer materials,  
ancillaries

Painting equipment and  
service guns

**MIRKA**

Abrasive materials, polishing  
systems and tools

**RUPES**

Polishing systems, tools and  
dust-extraction devices

**QUICKLINE**

Paint mixing system

**menzerna**

Polishing pastes, compounds  
and emulsions

Masking tapes

Adhesives and sealants

Masking and protective films

**MASTON**

Aerosol paints and protective  
compounds

**EVERCOAT**

Materials for car body repair

Guns for adhesives and  
sealants

# Offices

Branches of TD AVT0graph are located in big cities of Russia:

- St. Petersburg;
- Moscow;
- Ufa;
- Samara;
- Togliatti;
- Krasnodar.

Beside sales offices these branches have own training centers and warehouse complexes.

# Training center

Training center is a place of development of the company employees, its partners and customers. It is the venue for seminars, trainings, trials of equipment and new technologies. On the upper floor there are:

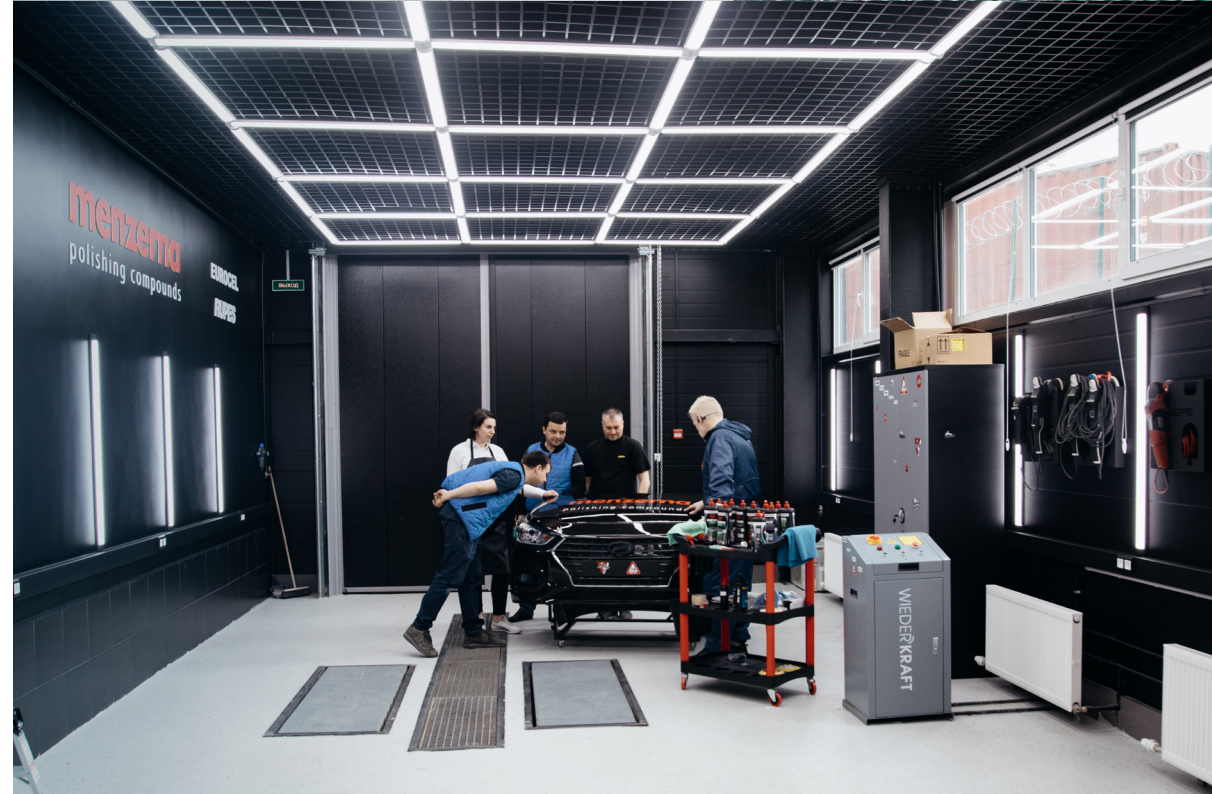

- Lobby;
- Meeting room;
- Auditorium;
- Office of technical department;
- Office of paint mixing specialists;
- Photo and videostudio.

# Training center

On the first floor there are areas for practical trainings and product testing:

- Paint spraying booth;
- Preparation area;
- Detailing area;
- Product testing area;
- Paint mixing area;
- Service center.

## AVTGraph - Industrial Technologies

Since 2011 the company works out technologies of surface preparation for painting and introduces them to manufacturing sites for improvement of efficiency.

It supplies professional materials, tools and equipment for conveyor painting and anticorrosive protection to plants in Russia, Kazakhstan and Belarus.

# Expertise

- Engineering of painting and dust extraction systems;
- Working out and introduction of systems of protective paint and lacquer coatings;
- Industrial painting of infrastructure facilities and petrol filling stations;
- Conveyor and repair of transport means;
- Analysis of manufacturing process at enterprises;
- Development of technologies for cleaning;
- Training of personnel on technological processes and work with equipment;
- PPE and labour safety.

# Certification

High quality of company products and services for automotive and railway industries are supported by the fine-tuned system of quality management conforming to international standards.

Participation in PPE Association underlines the contribution of AVTograph IT to the development of the market of innovative personal protection equipment.

# Main suppliers

Professional wiping materials

Sanding and polishing systems

JETA INDUSTRY

Paint and lacquer materials and protective coatings

Personal protection equipment

Paint and lacquer materials and protective coatings

Spray guns and painting equipment

Masking tapes

Paint and lacquer materials and paint mixing systems

Coated sanding materials

Spray guns and painting equipment

# Technical expertise

AVTograph IT provides services of technical analysis of production processes. Certified company specialists have trial and measuring devices for a comprehensive study of client's manufacturing in the following fields:

- Surface preparation;
- Industrial painting;
- Spot repair of paint and lacquer coating;
- Metal-work;
- Industrial welding;
- Industrial cleaning.

# Key accounts

# Offices

AVTOgraph - Industrial Technologies has branches in the following cities:

- St. Petersburg;
- Moscow;
- Naberezhnye Chelny;
- Togliatti;
- Nizhny Novgorod;
- Irkutsk;
- Kazan;
- Kaliningrad;
- Novosibirsk;
- Saratov;
- Ulyanovsk;
- Chelyabinsk;
- Minsk.

# Technical center

Technical center of AVTOgraph IT is equipped with testing stands on which technologies for various industries are tried out.

- Imitation of a railway car side;
- Area of industrial testing and paint spraying booth;
- Imitation of an aircraft body represents a fragment of the fuselage for practicing sanding systems on aluminum sheets with rivets, as well as processing of window.

# Technical center

Imitation of a section of conveyor line aligned with production processes of car manufacturers and allowing to practice technologies of follow-up processing of steel body:

- Processing of joints;
- Sanding;
- Application of sealant;
- Dust removal and degreasing;
- Surface preparation for priming and painting.

# Technical center

AVTOgraph IT engineers and supplies customized systems of paint and lacquer coatings. Development of technologies and training of employees are held in specially equipped premises:

- Climatic laboratory;
- Color matchig laboratory;
- Workshop of paints and clear coats equipped with complexes for mixing 2K and 3K materials;
- Classroom with devices for online tranings.

АБРАЗИВНЫЕ МАТЕРИАЛЫ  
ПРОИЗВОДСТВЕННОЕ ПРЕДПРИЯТИЕ

# PP Abrazivnye Materialy

Starting from 2004 PP Abrazivnye Materialy develops and introduces modern technologies for industrial sanding.

Clients of the company are leading enterprises operating in the field of wood and metal working, shipbuilding, furniture industry, as well as processing of glass and composites.

Specialists of PP Abrazivnye Materialy provide technical support in regards to company product range - from selection of materials and equipment to their application in solving production tasks.

# Production

**1,5 mln m<sup>2</sup>**

of raw materials per year

**1,2 mln rm**

of sanding belts per year

**600 тыс.**

of sanding rolls per year

**500 000**

of coated abrasives under own  
TM ABRAFORCE per year

# Production

PP Abrazivnye Materialy is a converting plant equipped with modern equipment and specializing in production of endless sanding belts and flexible abrasives.

Production technology was developed with the assistance of such world leaders in manufacturing of abrasives as: KWH Mirka (Finland), VSM (Germany) and PFERD (Germany).

All sanding tools are produced with the consideration of customer's individual and technological requirements and in the shortest time possible.

# Range

- Sanding discs, belts, strips, sheets and rolls;
- Cutting and grinding discs;
- TC-burrs;
- Diamond tools;
- Vetrified tools;
- Files and needle files;
- Wire brushes;
- Power and air tools.

# Key accounts

# Offices

PP Abrasive Materialy has representative offices in the biggest Russian cities:

- St. Petersburg;
- Moscow;
- Yekaterinburg;
- Novosibirsk.

Each brach has own independent warehouse and training center.

# Technical center

## Wood working area:

Wood working area features the sanding machine LBO 60 A STS with rotating table and automatic movement of brush and sanding unit that can sand and texture wood, polish and achieve a high-gloss finish.

Also there are 3 working stations equipped with state-of-art wood working tools and equipment from MIRKA.

# Technical center

## Metal working area:

Technologies of metal processing are tested and refined on the following equipment:

- Grind Master Group CFG 02 (2 Head Machine);
- Belt Grinder for Centerless Grinding Scantool 75 CGC;
- Grinding-and-polishing machine KEF Motor POD 8;
- Pipe grinding and polishing machine SOYUZ (COH03).

# WIEDERKRAFT

## WiederKraft RUS

Supplier of professional equipment and tools for car services, industrial enterprises and technical educational institutions. More than 70 factories in various countries are involved in the production of WiederKraft products.

Since 2019 WiederKraft RUS is a gold partner of WorldSkills Russia.

**GOLD Partner:**

# Range

Range of WiederKraft RUS includes more than 4,000 items, that makes it possible to fully equip service stations and service centers with industrial equipment, engineering and technological systems, manual, air and power tools, as well as metal furniture.

# Main suppliers

WIEDER  KRAFT

Tools and equipment for car  
repair

**Autorobot**

Equipment for body repair

**HARRISON**

Industrial compressor  
equipment

Air and hand tools

Professional hand tools

Air and hand tools

**CUSTOR**

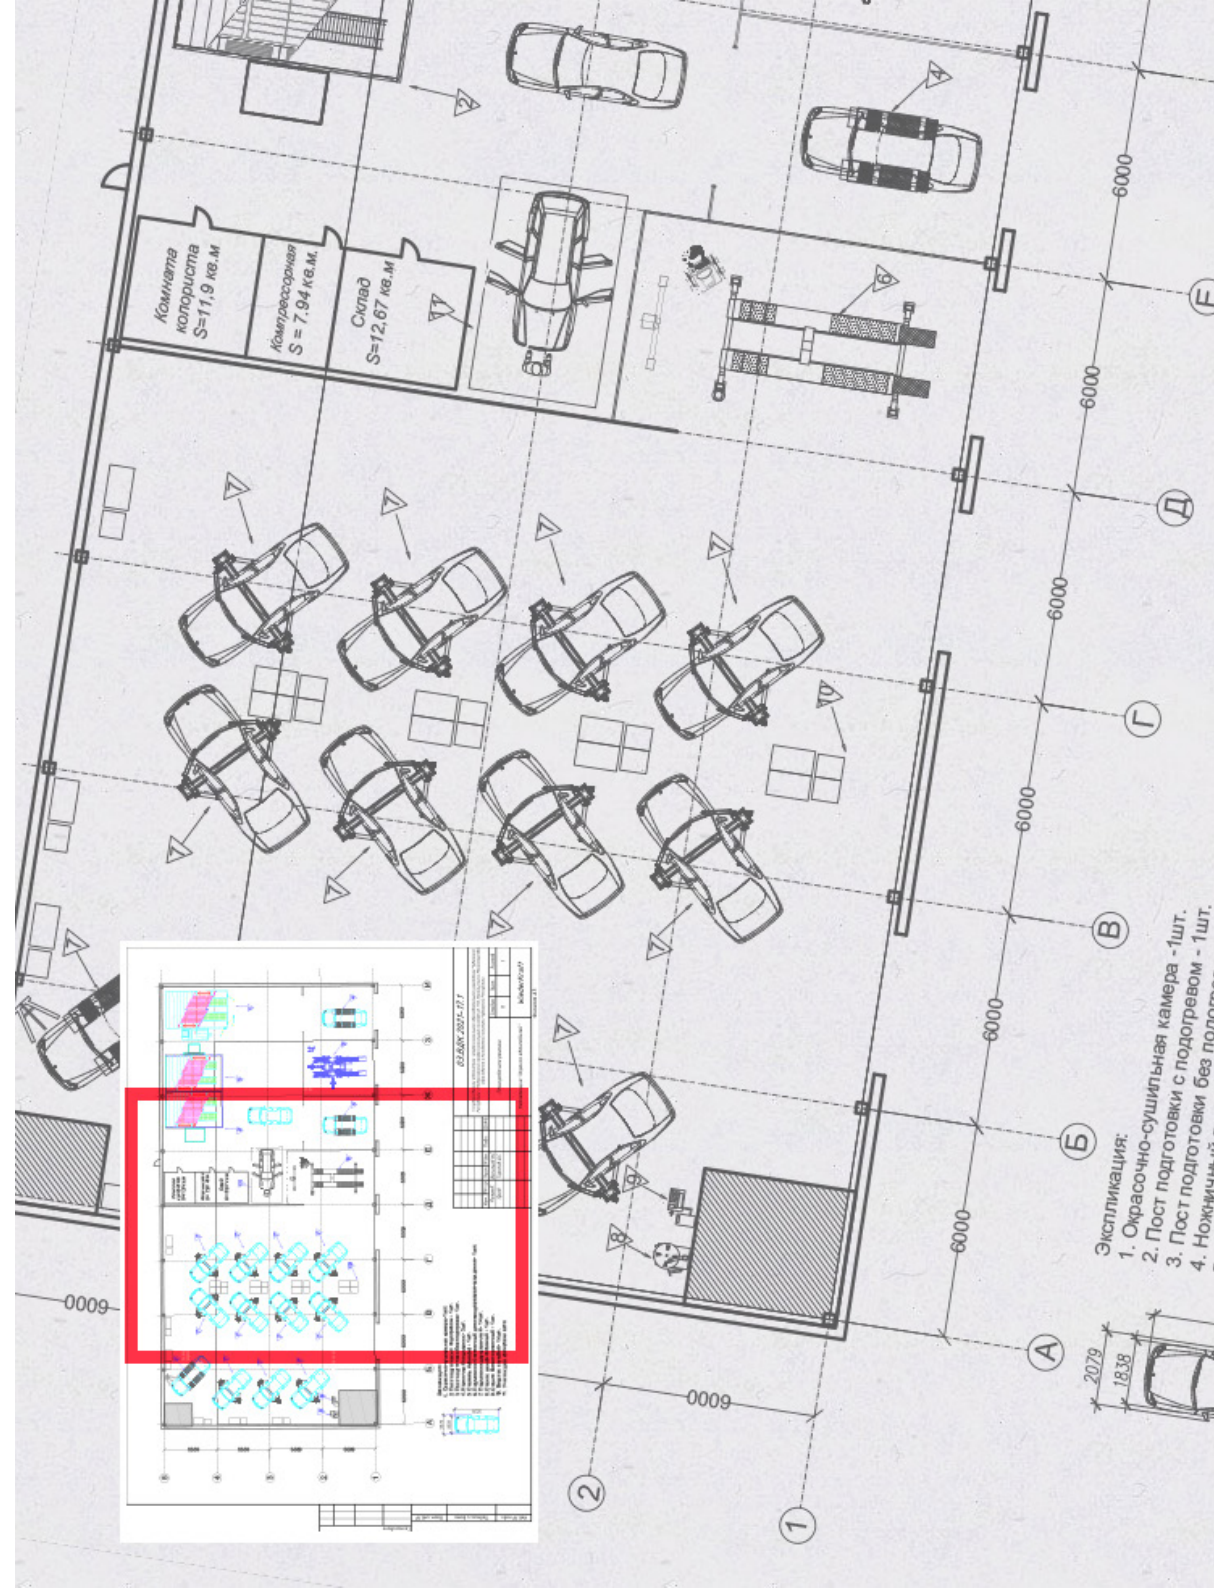

Air and hand tools

**Ferrum**

Metal furniture

# Engineering of service stations

Engineers and technicians fully undertake the creation of a turnkey service station: from concept to implementation. All projects are customized and carefully worked out at every stage - making of technical specifications, design, equipment selection, installation, launch and follow-up service.

# Key accounts

# Offices

WiederKraft RUS has representative offices in the following cities:

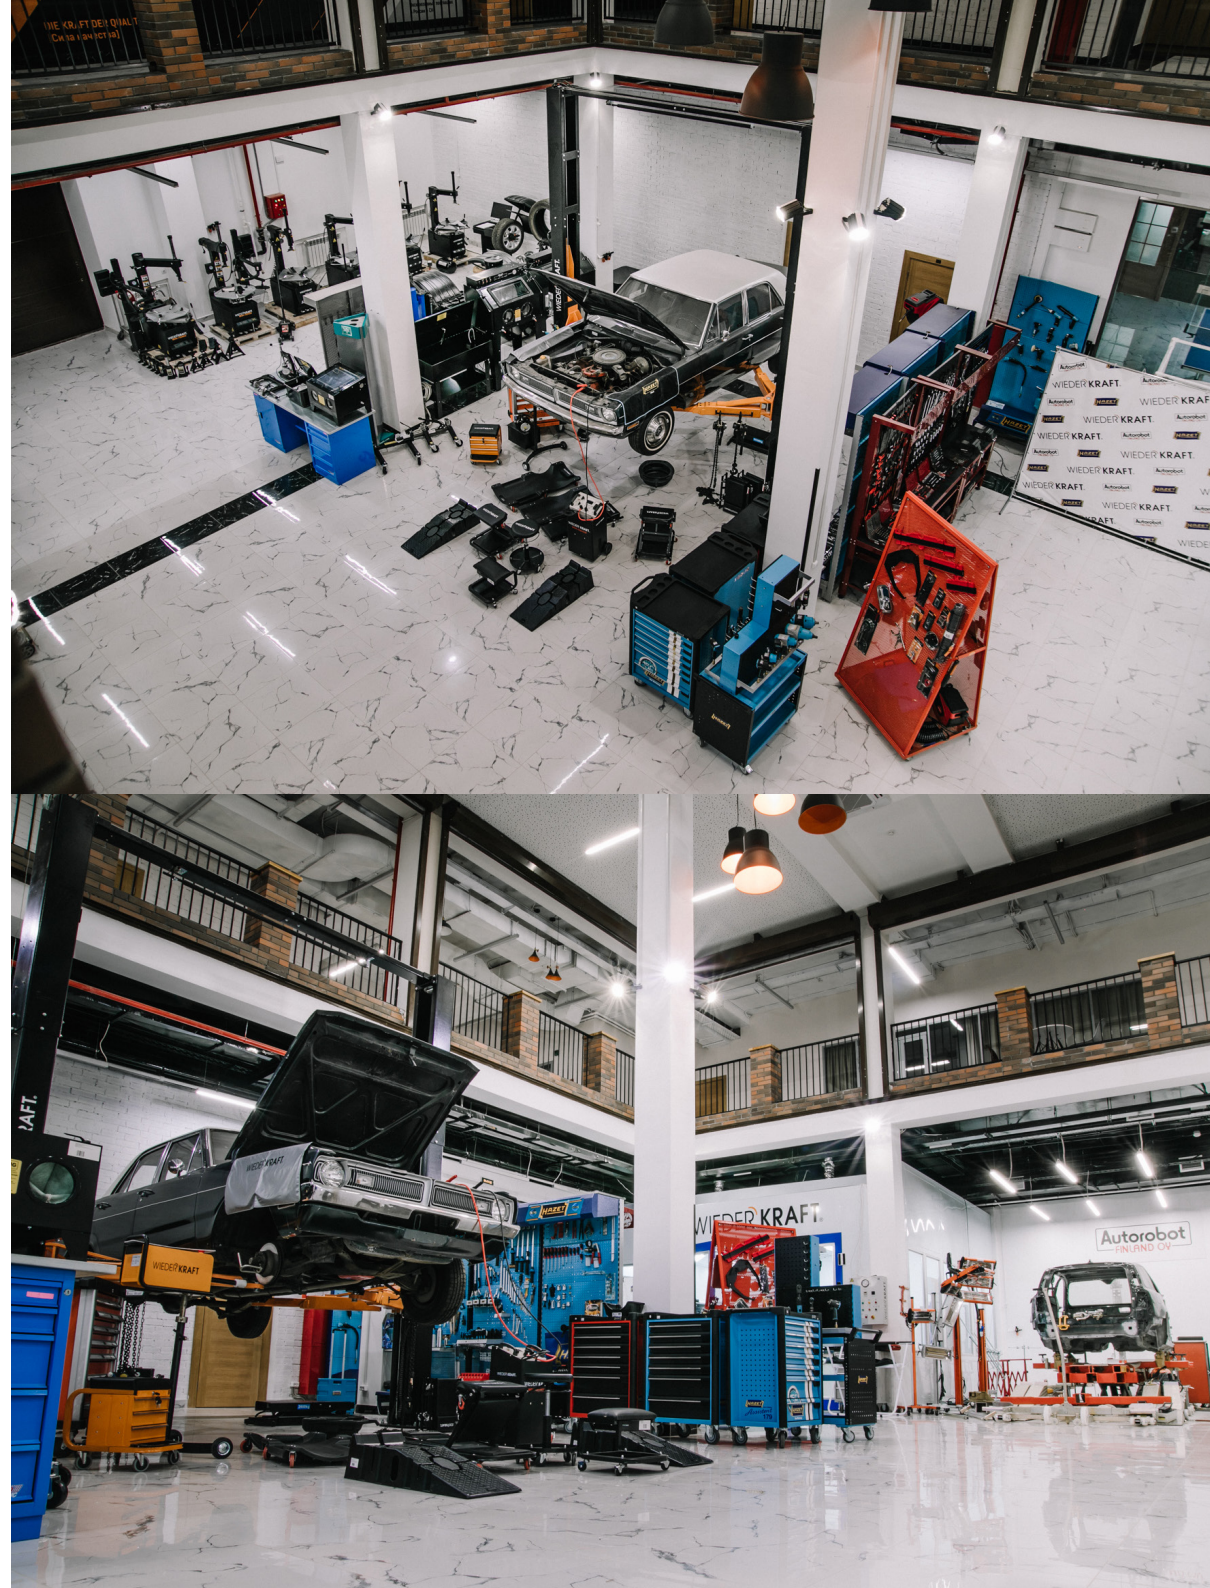

- St. Petersburg;
- Kazan;
- Yekaterinburg;
- Moscow;
- Samara;
- Togliatti;
- Arkhangelsk;
- Krasnodar;
- Rostov-on-Don;
- Stavropol;
- Ufa;
- Yaroslavl;
- Minsk.

# Showroom

The largest in Russia showroom for garage tools and equipment with square area of 500 m<sup>2</sup>.

Showroom hosts product trials and showcases including those within the frames of presentations and training seminars.

РЕШЕНИЯ

## AVTograph - Tooling Solutions

Specialized company dedicated to complex equipping of metal working enterprises: from selection of tools and equipment for metal cutting, milling and turning machines to personnel training.

# Selection of tools

Based on a vast experience of its specialists and the needs of customers AVTGraph - Tooling Solutions carries out an individual selection of tools for metal working, optimizes production processes and provides new enterprises with everything they need.

# Range

- Milling tools;
- Turning tools;
- Drilling tools;
- Threading tools;
- Measuring tools;
- Bench work tools;
- Electric-installation tools;
- Reaming tools;
- Machine and tooling equipment;
- Installations for temperature bulbs;
- Presetters.

# Main suppliers

## CNC machines

S.Gothard is the own brand of AVT0graph -To oling Solutions, under which the manufacturing and assembly of metal treating equipment is carried out. Nowadays under S.Gothard trademark a wide range of CNC machines is produced in various designs and configurations.

# Products range

Nowadays under S.Gothard trademark a wide range of CNC machines is produced in various designs and configurations. Our company supplies CNC machines ties under S.Gothard trademark on the list below:

- CNC vertical milling machines: 3-5 axes, for high-speed machining and for heavy-duty machining.
- Horizontal milling machining centers with CNC.
- Machines of portal type for processing of large-size details.
- CNC lathes: small-sized, for training purposes, with horizontal and inclined bed, with a driven tool, Y-axis and sub-spindle, for large-scale machining, as well as vertical and carousel lathes.

## «Industrial service technologies Limited Liability Company»

The «Industrial service technologies Limited Liability Company» was established in 2014 and specializes in equipping and providing industrial enterprises with painting, compressor, lifting and other production and technological equipment.

# Products range

WIEDER KRAFT

Painting equipment:

- Painting and drying booths and preparation stations;
- Shot blasting, washing and sprinkling booths;
- Booths and equipment for colorists;
- Automatic fire extinguishing and ventilation systems for spray booths;
- Protecting covering.

# Products range

***HARRISON***

Compressor equipment:

- Screw compressors;
- Modular compressor stations;
- Dehumidifiers of refrigerator and adsorption type;
- Receivers;
- Main filters;
- Pneumatic hoses.

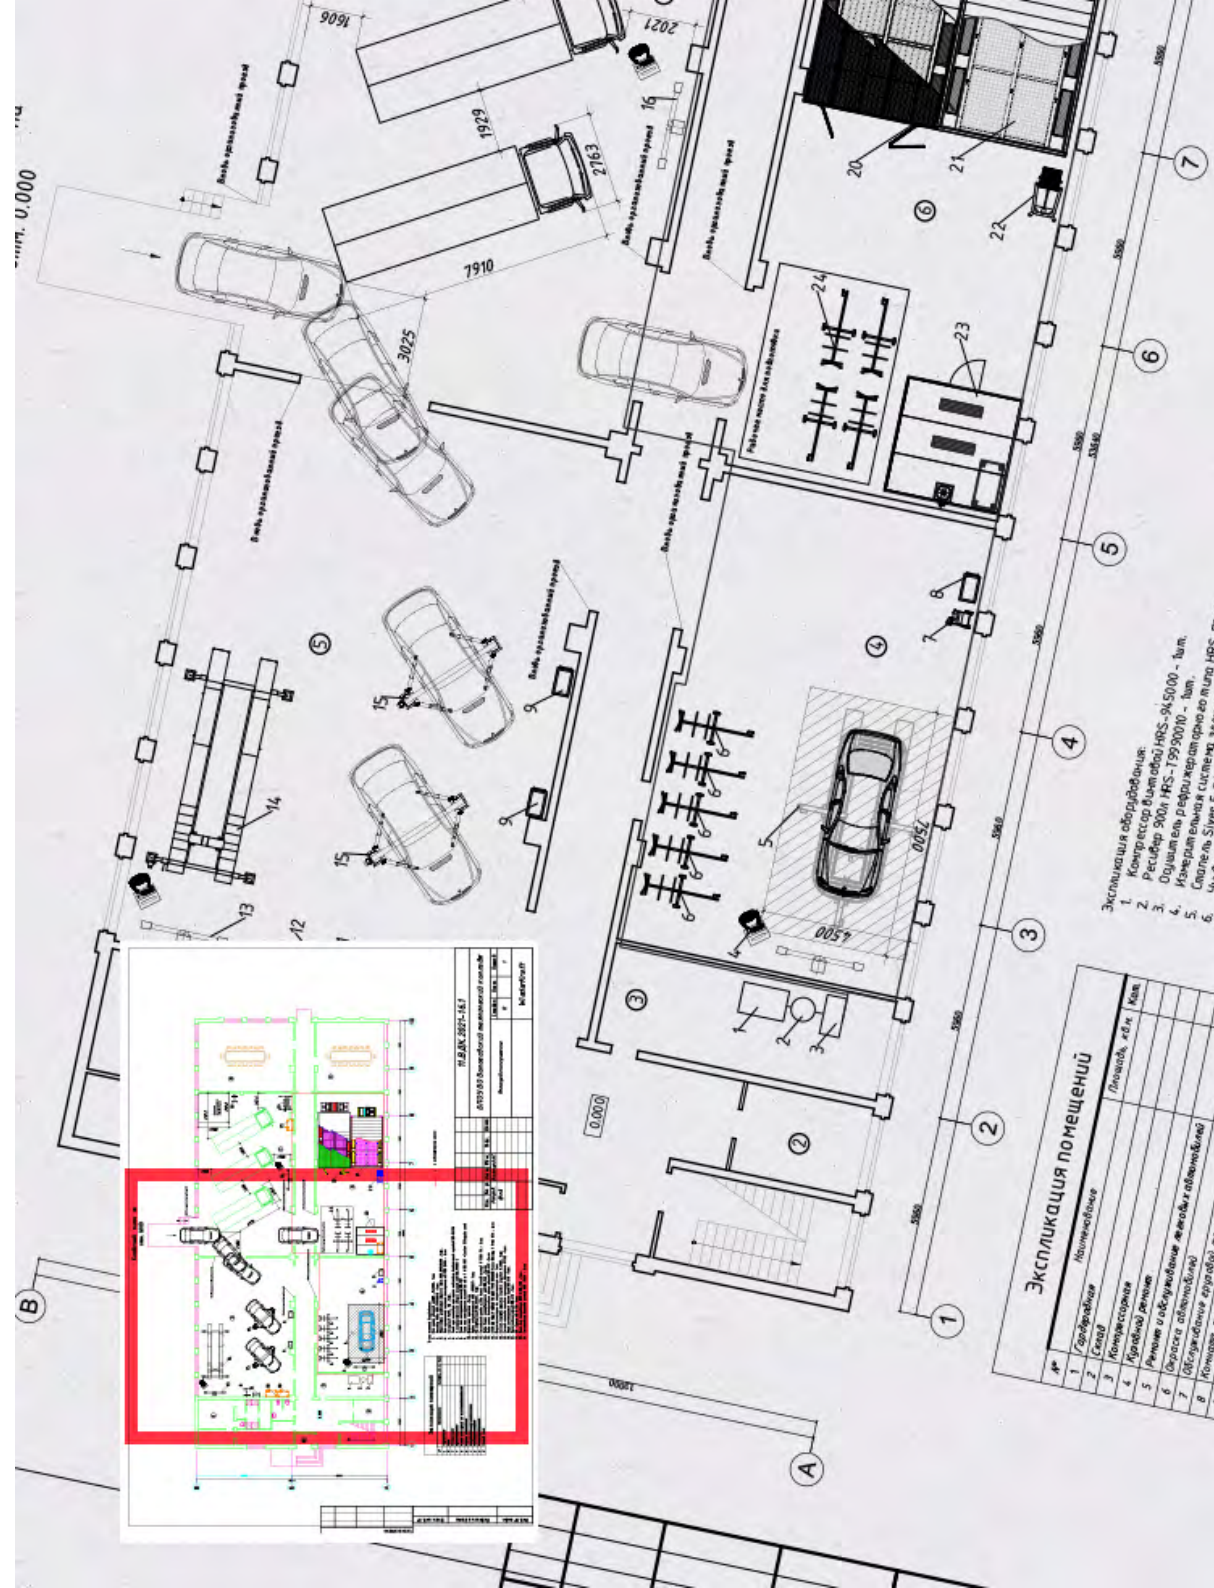

# Project department

Project department with its own staff of engineers and technicians provides a comprehensive approach and support of each project at all stages of its implementation.

Project department works on following tasks:

- Selection of production equipment for industrial painting shops;
- Design of new and reconstruction of old buildings;
- Design and modernization of ventilation systems, pneumatic and fuel lines

# Key clients

# MM КОЛОР

## MM-Color

MM-Color is the leader in the segment of complex supplies of materials and equipment for professional car body painting and repair and color matching. As well, company provides services on designing, equipping and servicing paint and body shops.

Since 2007 MM-Color is an official distributor of PPG products in Russia.

**Official distributor:**

# Range

## **MaxMeyer** by PPG

MaxMeyer – versatile solvent-based paint system for professional car body painting and repair.

## **DELTRON** by PPG

PPG Deltron – premium and high-tech paint system with a wide range of additional materials.

# Range

## **QUICKLINE** by PPG

QuickLine – budget solvent-based paint system for car services of B and C segments and DIY.

## **SELEMIX** by PPG

Selemix – paint system for painting metal structures, special and agricultural machinery.

# Main suppliers

Paint materials and color matching systems

Sanding and polishing systems

Spray guns and painting equipment

Air and power tools

Paint system

Paint and lacquer materials, ancillaries

Materials for car body repair

Adhesives and sealants

Masking tapes

Equipment for car body repair

# Technological planning of paint and body shops

MM-Color renders services on technological planning and equipping paint and body shops. Company specialists create projects of any complexity both for small auto repair stations as well as for large car services.

Employees of MM-Color provide individual consultations on optimizing the workspace and professional advice on the effective organization of technological processes, along with making individual selection of tools and equipment.

## AVTOgraph - Safety

AVTOgraph - Safety is one of the biggest national developers and manufacturers of personal protection equipment promoting its products on the Russian market under the brand JETA SAFETY.

By present the company created an optimal product line that got due recognition of big plants and enterprises, as well as of conventional users.

# Range

Company range consists of respiratory, eye and hearing protective means, hand protection solutions and coveralls for maximum safety and comfort.

The entire range of PPE under JETA SAFETY brand is tested and approved by occupational health and safety specialists and complies with European and Russian quality standards.

# Key accounts

**МИРАТОРГ**

**NOKIAN  
TYRES**

## DEBEVER

DEBEVER is a Russian brand of sanding and metal cutting tools for industrial sector and DIY, that appeared in St. Petersburg in 2014.

Company production facilities are located in Russia, Europe and China and this fact ensures a consistently high quality level of products, transparent logistics and constant availability of goods in stock.

# Advantages

DEBEVER guarantees its customers efficiency, safety and the best price/quality ratio on the Russian market.

To ensure that the company customers receive only the best products, each batch is thoroughly tested in DEBEVER technical center.

Certificate **ISO 9001:2015** confirms high quality of produced tools and equipment.

# Range

## **DEBEVER** INDUSTRIETECHNIEK

- TC-burrs;
- Cutting discs;
- Grinding discs;
- Flap discs;
- Core drills and boring machines;
- Cutters and bevellers.

## **BYCON**

- Diamond tools;
- Engines for diamond drilling;
- Mosaic grinding machines for concrete;
- Slot cutters for asphalt and concrete.

## **ROSWELD**

- Welding equipment and ancillaries.

# Range

DEBEVER is the exclusive supplier of domestic industrial-class welding equipment - ROSWELD. ROSWELD machines have no analogues on the Russian market and successfully compete with the products of the world's leading manufacturers. Outstanding technical characteristics and functionality allow ROSWELD equipment to solve both the most common and extremely specialized tasks in various industries.

# HANKO

## HANKO Rus

HANKO Rus is the official distributor of the world famous South Korean manufacturer of sanding and polishing materials HANKO, a leader in the development and production of abrasives, polishing pastes and tools for body repair.

Company clients include car plants, shipyards, auto repair shops and industrial companies dealing with the processing of artificial and natural stone, wood and metal, as well as furniture production, OEM companies and craftsmen of DIY segment.

# Advantages

HANKO Rus holds its key advantages in providing innovative and sophisticated products, flexibility of prices and availability of products at the principal warehouse in St. Petersburg.

But the main value of the company is a highly professional staff capable of solving a variety of tasks in the field of sanding, polishing and car care.

# Range

HANKO product range is represented by a wide selection of abrasives on net, polyester, paper, cloth and foam, polishing compounds and polishing discs, as well as materials and tools for detailing.

# Technical laboratory

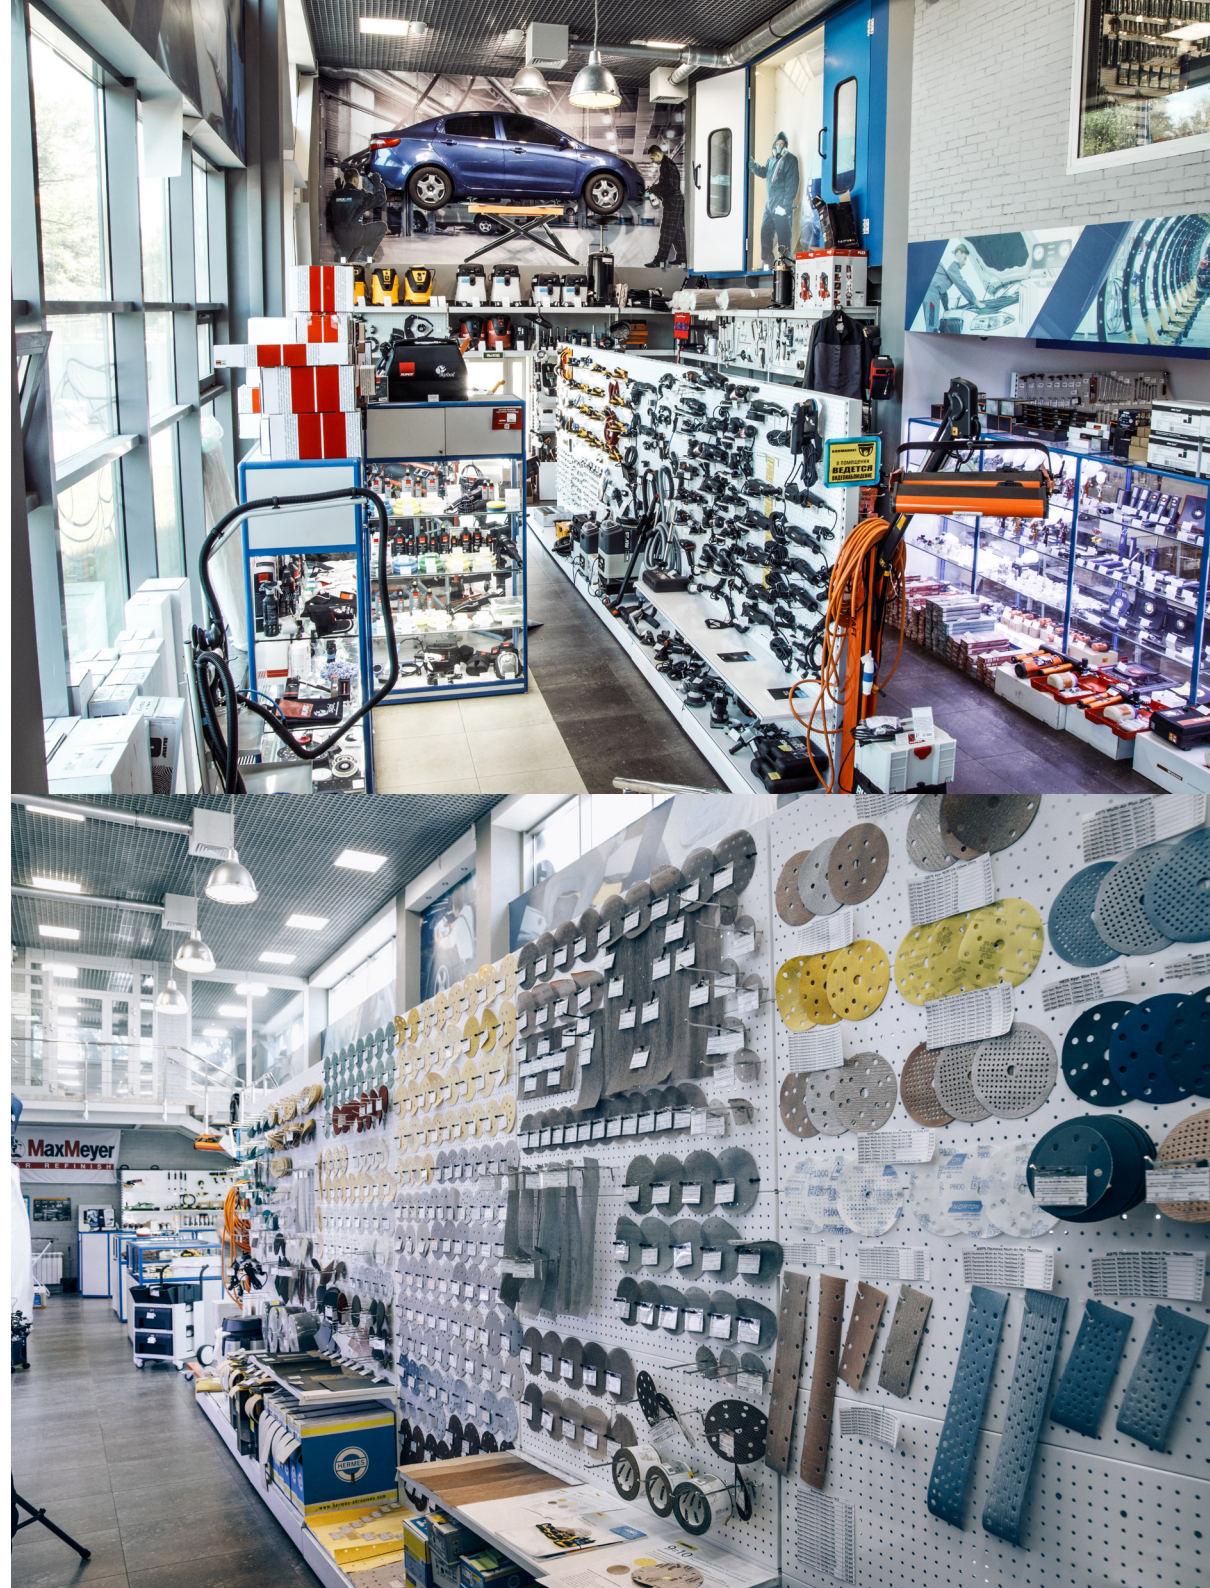

In technical laboratory HANKO Rus materials are tested and selected for such operations as: surface preparation and removal of color defects, dust-free sanding of wood, polishing of car body and furniture facades, industrial sanding of stone and stainless steel.

# Showroom AVTOfinisher

The main range of GC AVTograph is represented in the showroom AVTOfinisher located on the territory of the principal office in St. Petersburg.

On area 400 m<sup>2</sup> there are more than 15 000 items sold by the holding.
